

Technical Data Sheet: HE3219

Product manual HE3219 is a 2-official modified epoxy acrylate oligomer, which has the characteristics of

fast curing speed, good flexibility, good anti explosion performance, good wettability of

pigment, good fluidity, high gloss and good balance of ink and water. It is especially

suitable for UV offset ink, screen ink, vacuum electroplating primer.

Product features Fast curing speed

The pigment has good wettability

Good flexibility

Glossega

Recommended use Offset printing ink

Silk screen coating

Vacuum plating prime

Specifications Functionality (theoretical) 2

Appearance(By vision) Clear liquid

Viscosity (CPS/60 $^{\circ}$ C) 3400-7000

Color(Gardner) ≤4

Efficient content(%) 100

Packing Net weight 50KG plastic bucket and net weight 200KG iron drum

Storage conditions

Please keep cool or dry place, and avoid sun and heat;

Storage temperature does not exceed 40 °C, storage conditions under normal conditions

for at least 6 months.

Use matters Avoid touching the skin and clothing, wear protective gloves when handling;

Leak with a cloth when the leak, and wash with ethyl acetate; for details, please refer to the Material Safety Instructions (MSDS);

Each batch of goods to be tested before they can be put into production.
